

ENFORCEMENT AND COMPLIANCE DIVISION

To: All Applicants and Registered Early Defibrillation Services

From: David E. Cullen, Jr., Division Manager

Date: April 3, 2003

Re: **End of Virginia AED Registration Requirements**

The Office of Emergency Medical Services (EMS) is pleased to inform you that the requirement for registration of all AED's has been terminated as of April 3, 2003. Governor Warner signed House Bill 1860 that removes the registration requirements from the **Code of Virginia** and inserted language that made the Act effective from its date of passage.

Effective this date, any application for registration received by the Office of EMS will be returned to the applicant without being processed. Any application that was already being processed will be completed and a certificate of registration will be mailed to the applicant. We will not be issuing certificates of registration for Early Defibrillation Services for any applications received on or after April 3, 2003.
